

case study

Duck Creek Energy, Inc. - Cindy Thomas, vice president

summary:

Needed an easier way to handle their distributions instead of handling them through Excel spreadsheets

product:

Disbursement and JIB Manager (DM)

problem:

Duck Creek Energy needed an easier and more accurate way to handle their distributions for more than 100 wells throughout northeast Ohio. They originally were handling distributions for more than 300 owners through Excel spreadsheets.

solution:

With the Disbursement and JIB Manager, Duck Creek Energy can now "easily manage all of its information, as well as handle all the steps from A through Z of oil and gas disbursements: from building the well files, owner files and division of interests to entering revenue and expenses, creating 1099's, tax reports, annual State reports, and the ability to create reports at the click of a mouse," said Cindy Thomas, vice president of Duck Creek Energy, Inc.

result:

Duck Creek Energy, Inc. can now easily manage the ever-growing information in today's competitive industry in the shortest amount of time possible.

"Your product is excellent, your support and customer service is excellent, and we would highly recommend SherWare for their oil and gas accounting needs. Thank you for making such a great product, and for continuing to improve the product, keeping it current and relevant for meeting today's demands," Thomas said.
