

# Which Product is Right For You?

What type of accounting side do you need for your company?

A full accounting program built into my revenue distribution/joint interest billing system.

**We recommend:**

Accounting Manager (AM)

**What this product does:**

The Accounting Manager is a full accounting program includes a general ledger and lets you track payables and receivables, as well as your revenue distributions and joint interest billing.

I use QuickBooks already or I want to use QuickBooks to track my accounting.

**We recommend:**

Disbursement and JIB Manager Integrated Edition (DMIE)

How many wells/companies do you have?

Less than 20 wells and only one company

DMIE 20 - Basic Version

More than 20 wells or more than one company

DMIE - Standard Version

**What this product does:**

The DMIE is a revenue distribution and joint interest billing software that works alongside your QuickBooks product. Enter your well-related information such as owners, wells, interests, receipts and bills within our software. Once it's saved, it automatically saves into your QuickBooks company. No double-entering is required.

None. I just need to track my revenue distributions and joint interest billing.

**We recommend:**

Disbursement and JIB Manager (DM)

**What this product does:**

The Disbursement and JIB Manager is a stand alone revenue distribution program that allows you to track distributions and joint interest billing. It has no interface with accounting and allows you to track your owners, wells and interests in one location.

## Need the software to do additional functions?
